Instruction manual pH Soil Tester

pH-Measurement

Insert pH Soil Tester with the complete probe firmly into the humid soil.

After some seconds read pH value on the red scale.
Measuring range: 3 – 8 pH
Accuracy: 0,2 – 0,4 pH

Important tips

Insert pH Soil Tester firmly into the ground. The complete probe point must have soil contact.

The soil must be humid for the pH measurement. For the humidity control press white button, the blue scale must show at least one value of 7.

After the measurement wipe the probe point clean with a piece of dry cloth.

Test loose soil in the shell condense provided, put pH Soil Tester firmly in the shell and measure pH.

Attention: pH Soil Tester is not suitable for measurements of solutions, substrates and composts.

Instruction manual pH Soil Tester

Evaluation of the measuring results

Generally the optimal pH factor is for almost all plants in the lightly sour area between pH 6.0 - 7.0.

Exception: Sucked lime-fleeing cultures preferring a very sour ground, e.g., rhododendron, azaleas, moor (Erica carnea), raspberry, etc.

The right setting of the pH factor is necessary, because, among the rest, the availability of nutrients strongly depends on the pH value. The principal nutrients like phosphorus or potassium are as a rule not enough available at too low pH values. However, absorption of trace elements such as iron for example, is blocked at too high pH values ("iron chlorose").

The dependence of the nutrient uptake on the pH factor is made clear by the following graphic charts. The stronger the beam, the better is the nutrient availability.

pH factor regulation:

A **too low pH value** can be raised by addition of lime. The rule of thumb is:

To increase pH factor by 1 pH on a surface of 100 sq. m.
there are approx. 25 kg of carbonic lime necessary

By heavy soils the approximate value can be adapted upwards, by light soils downwards.

Too high pH values can be lowered only by using fertilizer with sour reaction or in the long term by application of peat.

Standard pH-Values

Substrates:

Substrate (peat soil) for young plants (salt-sensitive young plants)
 Substrate (peat soil) for young plants (salt-tolerable young plants)
 Substrate (peat soil) for seeding
 Substrate (peat soil) for propagation

pH-Value

Ornamental Plants:

Botanic Name	German Name	pH-Value
<i>Abies balsamea</i>	Zwergtanne	6,0-8,0
<i>Abies concolor</i>	Grautanne	5,5-7,5
<i>Abies homolepis</i>	Nikkotanne	5,0-7,0
<i>Abies koreana</i>	Koreatanne	6,0-8,0
<i>Abies lasiocarpa</i>	Compacta	6,0-8,0
<i>Abies nordmanniana</i>	Nordmantanne	6,0-8,0
<i>Abies pinsapo</i>	Kelleristanne	6,0-8,0
<i>Abies procera</i>	Silbertanne	5,0-7,0
<i>Abies veitchii</i>	Veichtanne	5,0-7,0
<i>Acer campestre</i>	Feldahorn	6,0-7,0
<i>Acer capillipes</i>	Schlangenhautahorn	5,5-6,5
<i>Acer ginnala</i>	Feuerhorn	5,5-6,5
<i>Acer japonicum</i>	Japanischer Feuerhorn	6,0-7,0
<i>Acer negundo</i>	Eschenahorn	6,0-7,0
<i>Acer palmatum</i>	Fächerahorn	6,0-7,0
<i>Acer pennsylvanicum</i>	Streifenahorn	6,0-7,0
<i>Acer plantanoides</i>	Spitzahorn	6,5-7,5
<i>Acer pseudoplatanus</i>	Bergahorn	6,0-8,0
<i>Acer rubrum</i>	Rotahorn	5,5-6,5
<i>Acer rufinerve</i>	Rostbartahorn	6,0-7,0
<i>Acer saccharinum</i>	Silberahorn	6,0-7,0
<i>Acer saccharum</i>	Zuckerahorn	6,0-7,0
<i>Achillea hybrida</i>		5,0-6,5
<i>Actinidia arguta</i>	Strahlengriffel	6,0-7,0
<i>Actinidia chinensis</i>	Kiwi	6,0-7,0
<i>Adiantum</i>		4,5-6,0
<i>Aechmea fasciata</i>		5,5-6,5
<i>Aesculus carnea</i>	Kastanie	6,0-8,0
<i>Aesculus hippocastanum</i>	Roßkastanie	6,0-8,0
<i>Aesculus parviflora</i>	Strauchkastanie	6,0-8,0
<i>Ailanthus altissima</i>	Götterbaum	6,0-7,0
<i>Akebia quinata</i>	Klettergurke	6,0-7,0
<i>Alnus cordata</i>	Erle	6,5-7,5
<i>Alnus glutinosa</i>	Schwarz-Rot-Erle	5,5-6,5
<i>Alnus incana</i>	Grau-Weiß-Erle	7,0-8,0
<i>Alstromeria</i>		6,0-7,0
<i>Amaranthus-Fuchsschwanz</i>		5,5-6,5
<i>Amelanchier laevis</i>	Hängende Felsenbirne	6,5-7,5
<i>Amelanchier lamarckii</i>	Kupfer-Felsenbirne	6,5-8,0
<i>Amorpha canescens</i>	Bleibusch	6,5-7,5
<i>Amorpha fruticosa</i>	Bastardindigo	6,5-7,5
<i>Anemone coronaria</i>		5,5-6,5

Botanic Name	German Name	pH-Value
Anthurium andreanum		4,5-5,5
Anthurium scherzianum		4,5-5,5
Antirrhinum-Löwenmaul		5,5-7,0
Aphelandra squattosa		5,0-6,5
Aralia elata	Aralie	6,5-7,5
Araucania araucana	Schmucktanne	7,0-8,0
Aristolochia macrrophylla	Pfeifenwinde	6,5-7,5
Asparagus plumus		5,5-7,0
Asparagus sprengeri		5,5-7,0
Azalea indica		3,8-5,0
Beqonia bertinii		5,0-6,5
Beqonia elatior		5,0-6,5
Beqonia Knollenbeqonien		5,0-6,0
Beqonia Lorraine		5,0-6,0
Beqonia semperflorens		5,0-6,5
Bellis perennis		6,0-7,0
Berberis buxifolia	Berberitze	6,5-7,5
Berberis candidula	Berberitze	6,5-7,5
Berberis gagnepainii	Berberitze	6,5-7,5
Berberis hookeri	Berberitze	6,5-7,5
Berberis julianae	Berberitze	6,5-7,5
Berberis parkjuweel	Berberitze	6,5-7,5
Berberis red jewel	Berberitze	6,5-7,5
Berberis stenophylla	Berberitze	6,5-7,5
Berberis superba	Berberitze	6,5-7,5
Berberis thunbergii	Berberitze	6,5-7,5
Berberis verrucandi	Berberitze	6,5-7,5
Berberis wilsoniae	Berberitze	6,5-7,5
Betula albosinensis	Kupferbirke	6,5-7,5
Betula ermannii	Goldbirke	6,5-7,5
Betula maximowicziana	Birke	6,5-7,5
Betula nana	Polar Zwergbirke	6,5-7,5
Betula nigra	Schwarzbirke	6,0-7,0
Betula papyrifera	Papierbirke	6,0-8,0
Betula pend. Dalecartica	Ornas Birke	6,5-7,5
Betula pend. Fastigata	Säulenbirke	6,5-7,5
Betula pend. Purpurea	Purpurbirke	6,5-7,5
Betula pend. Tristis	Hängebirke	6,5-7,5
Betula pend. Youngii	Trauerbirke	6,5-7,5
Betula pendule	Weiß-Sandbirke	6,0-7,0
Betula platyphylla	Japanische Birke	6,5-7,5
Betula utilis	Himalaya Birke	6,0-6,5
Brassica oleracea		6,0-7,0
Bromelien		4,0-5,5
Buddlera alternifolia	Sommerflieder	6,0-8,0
Buddlera davidii	Hybriden	6,0-8,0
Buxus sempervierens	Buxbaum	6,0-8,0
Calceolaria Hybriden		5,0-6,5
Callicarpa bodinieri	Schönfrucht	6,0-6,5
Calluna vulgaris	Besenheide	4,0-5,0
Calyanthus floridus	Gewürzstrauch	6,5-7,5
Camelia japonica		4,0-5,5
Campanula		6,0-6,5
Campsis radicans	Trompetenblume	6,0-7,0
Caragana arboresens	Erbsenstrauch	6,0-8,0
Carpinus betulus	Hain-Weißbuche	6,0-8,0
Caryopteris clandonensis	Bartblume	6,5-7,5

Botanic Name	German Name	pH-Value
<i>Castanea sativa</i>	Eßbare Kastanie	6,0-7,0
<i>Catalpa bignonioides</i>	Trompetenbaum	7,0-8,5
<i>Cattleya mossiae</i>		4,0-5,5
<i>Ceanothus Gloire de Versailles</i>	Säckelblume	6,5-7,5
<i>Cedrus atlantica</i>	Zeder	7,0-8,0
<i>Cedrus deodara</i>	Himalajazeder	5,0-7,0
<i>Cedrus glauca</i>	Blauzeder	6,5-8,5
<i>Cedrus pyramidalis</i>	Pyramidenzeder	6,5-8,5
<i>Cedrus pendula</i>	Hängezeder	6,5-8,5
<i>Celastrus orbiculatus</i>	Baumwürger	6,5-7,5
<i>Cercidiphyllum japonicum</i>	Judasblattbaum	6,5-7,5
<i>Cercis siliquastrum</i>	Judasbaum	6,5-8,0
